Acknowledgements

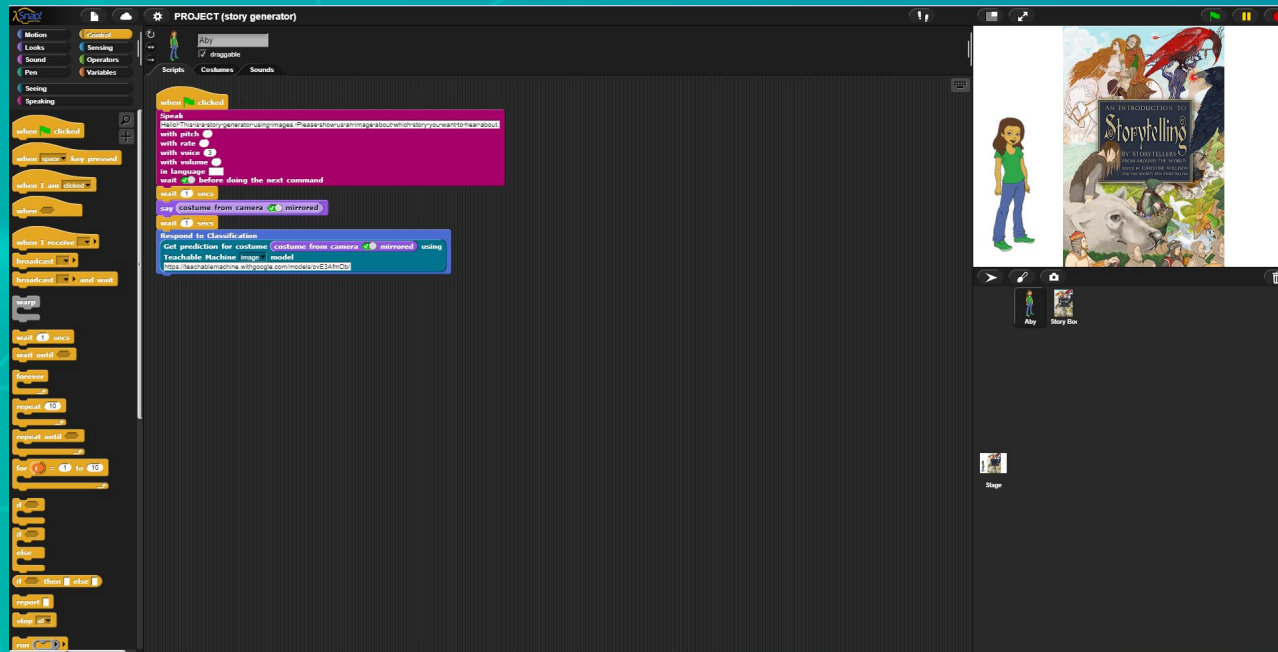

- A small vote of thanks for all who have helped me in this journey of App Development –my parents, Mr. Ken, Clevered, Mentors, Group Members, Friends, etc.

About Me...

- My name is Aisha, I am 12 years old and I live in Dubai. I am in year 7 and currently studying at Dubai College. I enjoy reading and being creative.

About My Internship with Clevered...

My Internship experience with Clevered has gone well, and I have enjoyed the lessons.

I have received 'Rockstar for Attentiveness' and 'Rockstar for Project Completion'.

About My App...

- I have created a Story Generator app. In this app, the sprite (Aby) asks what story you want to hear. You show a photo, and using image recognition, she tells a story (using Speech Synthesis), based on the image.

How do I use the App?

1. Press the Green Flag to start the Story Generator.
2. The sprite (Aby) will ask (using Speech Synthesis) you to show a picture/image of a story you want to hear about. For example: show the picture of a princess if you want to hear a story of Cinderella.
3. It can tell you stories of Cinderella, Harry Potter, Superheroes and the Hare and the Tortoise.

Option Name

(This will be repeated for each option of the App)

- Steps to use the Story Generator:
- Make sure that the picture you show is clear, otherwise, the sprite (Aby) will tell the wrong story. A good internet connection and a proper webcam is needed.

Contact Person

- Please feel free to reach out to me at aishaditta2020@hotmail.com for any questions/ concerns/ suggestions on the App.

Thank you!
